

Typography

Typography guidance for a high-contrast enterprise platform.

Primary Direction

Use a modern geometric sans-serif with high legibility.

Typography should feel clear, calm, and executive.

Prefer white foreground text on Midnight for core platform surfaces.

Hierarchy

Use restrained type scale and compact rhythm for operational views.

Reserve large display type for true brand moments, splash screens, and first-run surfaces.

Avoid decorative typography and novelty treatments.

Language

Preserve FOP(TM), Mission Control(TM), Buildings Under Protection(TM), and BUILD - ADVISE - PROTECT.

Do not use internal token names as customer-facing stage names.
